

Divij Reddy Mothe

SUMMARY OF QUALIFICATIONS:

- Over 8+ years of experience in Software Analysis, Software Quality Assurance Testing, and SDET.
- Extensive experience in Manual and Automation Testing of Web, Desktop, Web Services, databases, UI Testing, and mobile applications across Financial, Healthcare, and Ecommerce/Retail domains.
- Proficient in reviewing and analyzing Software Requirements Specification (SRS) and Business Requirement Documents (BRD).
- Skilled in creating and developing Test Plans, Test Cases, and Test Scripts, and collaborating with Development Teams.
- Expertise in Manual and Automation Testing for Web and Mobile applications using Selenium WebDriver, Cypress, Appium, JAVA, JavaScript, Cucumber, TestNG, Mocha.
- Proficient in developing and debugging Automation Test Scripts on Eclipse and IntelliJ.
- Extensive experience in Black Box and White Box testing, and Hands-on experience in Quality Assurance, including Functional, System, Smoke, Regression, Integration, User Acceptance Test (UAT), and Compatibility Testing of Web and Mobile Native Applications.
- Knowledgeable in Agile Software Development methodologies, including sprint planning, Scrum, Backlog Grooming, Sprint Review, and Retrospective.
- Automated Test Cases in TDD (Test Driven Development) and BDD (Behavior Driven Development).
- Strong foundation in Core Java development concepts, including Object-Oriented Programming, Collections, Exception Handling, and Multi-Threading.
- Conducted comprehensive API testing using Rest Assured and Postman, validating RESTful services for response correctness, schema validation, and authentication flows.
- Leveraged Generative AI tools like GitHub Copilot to accelerate test automation development, improve code quality, and enhance productivity in Agile environments.
- Experienced with build tools such as Maven, Jenkins, and Gradle.
- Proficient with defect tracking tools like Jira.
- Knowledgeable in various testing frameworks, including Keyword-driven, Data-driven, Hybrid frameworks, Page Object Model and Design patterns.
- Excellent knowledge of SQL, experienced in writing SQL queries for back-end testing and data validation.
- Expertise in testing REST APIs using Postman and SOAPUI and Automated using rest assured and Karate DSL framework.
- Experienced with source version control tools such as GitHub, GitLab, and Bitbucket.
- Highly motivated team player with strong interpersonal and customer relational skills and proven communication, organizational, analytical, presentation skills, and leadership qualities.

TECHNICAL SKILLS:

- **Testing Tools:** Selenium Web Driver, WebDriver IO, JUnit, JMeter, Cucumber, Mocha, Chai, Manual Testing, Appium.
- **Web technologies:** HTTP, XML, HTML, CSS, NodeJS, Cypress
- **Language/ Script:** Java, Python, JavaScript.
- **Frameworks:** JUnit, TestNG, Mocha, TDD, BDD.
- **Firefox Add-ons:** XPath, Firebug, Fire path.
- **Web Services:** SOAP, REST, SOAP UI, Rest Assured, Karate.
- **Agile Tools:** HP ALM, JIRA, Zephyr.
- **Build/ CI Tools:** Maven, Jenkins, Gradle, Docker.
- **Databases Technologies:** MS SQL, Oracle, T-SQL.
- **Platforms:** Windows, Linux, and Mac.

PROFESSIONAL EXPERIENCE:

Client: HCSC, Richardson, TX (Remote)

March 2022 –

Present

Role: Sr. Test Engineer /SDET

- Followed Agile methodology in a SAFe environment for testing epics and automating SAFe iterations.
- Responsible for integration, UI, desktop, backend database test automation.
- Developed test plans, test cases, and logged defects using QTest.
- Utilized Page Object Design Pattern, Data Driven, Keyword Driven, and Robot Frameworks.
- Automated functional, integration, and regression tests using Selenium, WinApp Driver, Appium and OJDBC.
- Automated the Functional, Integration test cases using tools from Appium for mobile Native Application on both iOS and Android and Selenium Suite of products like, Selenium Grid for web applications and JDBC Connectors and Excel utilities for Macro validations.
- Conducted verification, validation, and transformations on data text files before database loading.
- Performed functional, regression, integration, and automation testing.
- Performed REST API validation using Rest Assured and Postman, validating API endpoints, response payloads, and status codes in parallel to UI flows.

- Developed and executed UI automation test scripts for enterprise web applications using Selenium WebDriver with Java.
- Designed and implemented UI test automation frameworks from scratch using Cypress with JavaScript,
- Developed automated scripts using Selenium, Java, WinApp Driver, and Robot Framework in Eclipse.
- Conducted database validation using SQL and performed backend API testing.
- Collaborated with developers and backend teams to debug API issues and improve test coverage.
- Performed data-driven testing using external files (Excel/CSV/JSON) to validate multiple test scenarios with dynamic inputs.
- Improved test coverage by optimizing automation scripts for enhanced efficiency and Automated 75% of regression test cases, significantly reducing manual testing efforts.
- Managed defects using Jira and coordinated with developers for issue resolution.
- Revamped documentation and reporting procedures for enhanced clarity. Provided mentorship to new testers and QA staff, fostering a strong understanding of company methodologies.

Environment: Selenium, Cypress, WinApp Driver, Appium, Rest Assured, Java, Eclipse, OJDBC, MS SQL Server Management Studio, Jira, Teradata SQL Assistant, QTest, Appium, Jenkins, iOS, Android, WinSCP, TSQL, Hive DB, Perfecto, Desktop Applications, BMC Control M, Cyberark Secure Desktop.

Client: Apple Inc, Cupertino, CA, (Remote)
2022

June 2021 – Feb

Role: SDET

- Followed Agile methodology for developing and automating user stories. participated in Scrum meetings.
- Responsible for UI functional automation using WebDriverIO, Cypress IO, and Playwright.
- Documented and compared UI automation tools for Angular applications.
- Successfully completed proof of concept (POC) for UI automation tools, streamlining the tool evaluation process.
- Developed test frameworks in Cypress with assertions, reporters, and integrations.
- Automated functional, sanity, integration, and regression tests for multi-browser environments.
- Performed cross-browser and parallel testing.
- Designed reusable API automation scripts and integrated them into CI/CD pipelines, contributing to efficient regression coverage and reducing release cycles by 30%.
- Automated critical UI regression and sanity test cases using Selenium WebDriver with Java and TestNG, improving test reliability and reducing manual efforts by over 70%.
- Developed scripts using Cypress, JavaScript, Mocha, and Grunt.
- Configured continuous integration with Rio and performed web service automation with Rest Assured.
- Conducted data validation using SQL and tested RESTful services with Postman.
- Managed defects using Radar and coordinated with developers for issue resolution.

Environment: NodeJS, NPM, JavaScript, Cypress, JavaScript, Mocha, Grunt, Rio, Java, Rest Assured, VisualStudioCode, Quip, Confluence, Postman, Radar, YAML, Docker, Oracle.

Client: QVC Inc, Westchester, PA (Remote)
2021

Nov 2020 – May

Role: Software Engineer in Test /SDET

- Followed Agile methodology and participated in Scrum meetings.
- Automated functional, regression, and integration tests using Appium for iOS and Android.
- Utilised Selenium Grid for web applications and performed cross-browser testing.
- Developed automation scripts using Appium, Java, and TestNG in Eclipse.
- Configured Jenkins for continuous integration and achieved faster release cycles by 20% through efficient test automation and continuous integration practices.
- Performed complex SQL queries for backend database validation across multiple databases like SQL Server, Oracle, and Teradata, ensuring data consistency across layers.
- Designed and implemented reusable feature files for end-to-end testing of APIs, leveraging Karate's data-driven capabilities.
- Integrated Karate-based API tests with CI/CD tools (Jenkins, Git) to enable automated regression and smoke testing.
- Performed response validation, error handling, and schema checks to ensure API contract integrity.
- Managed defects using Jira and HP ALM.

Environment: Appium, Selenium, ALM, Jenkins, Maven, Eclipse, Java, Test NG, iOS, Android, Bitbucket, Sauce Labs, Headspin, XCUITest, Espresso, Confluence, Postman, Rest Assured, XML, JSON, Jira.

Client: BOSE Corporation, Brighton, MA
2020

Nov 2018 – Oct

Role: SW QA Engineer/SDET Test Engineer

- Followed Agile methodology and participated in Scrum meetings.
- Analysed user stories and technical requirements.
- Developed automated scripts using Appium, Java, and TestNG and Increased test automation coverage by 60%.
- Performed VoiceOver accessibility testing on iOS, Android ensuring compliance with WCAG standards and enhancing usability for visually impaired users.
- Responsible for UI and functional automation.
- Conducted cross-platform testing for iOS and Android.
- Developed and maintained robust API automation frameworks using Rest Assured for validating RESTful web services.

- Created and executed end-to-end automated API tests covering CRUD operations, authentication, and complex business logic scenarios.
- Integrated Rest Assured test suits TestNG/JUnit and configured for parallel execution to improve efficiency.
- Implemented JSON and XML payload validations, response time assertions, and status code verifications.
- Managed test cases in TestRail and defects in Jira.

Environment: Appium, Test Rail, AppliTools, Jenkins, XCode, Android Studio, Maven, Intelli-j, Java, Test NG, iOS, Android, GitHub, Confluence, Postman, Rest API, Jira, MAC-OS.

Client: Deka Research and Development, Manchester, NH
2018

May 2017 – Oct

Role: SW QA Engineer/SDet/Test Engineer

- Followed Agile methodologies and participated in Scrum meetings.
- Automated mobile native applications using Appium and BDD framework.
- Increased automation test coverage for mobile applications using Appium and BDD framework.
- Developed and documented test strategies, scenarios, and test cases.
- Conducted functional and regression testing using Appium, Java, and Cucumber.
- Managed defects using Jira.

Environment: Appium, Jenkins, XCode, Android Studio, Gradle, Intelli-j, Java, Cucumber, Gherkin, IOS, Android, SQLite, GITLAB, Rest API, Postman, Jira, MAC-OS.

Saibersys INC., Carrollton, TX
2017

Oct 2016 – April

Role: SW QA Engineer

- Reviewed use cases and converted them into test scenarios and scripts.
- Logged and tracked defects until closure.
- Conducted cross-browser testing using Selenium WebDriver and TestNG.
- Managed test data and SQL queries for backend testing.
- I participated in integration, system, and smoke testing.
- Managed test cases and defects in Jira.
- Improved defect detection rate by 30% through comprehensive test coverage and diligent manual testing.

Environment: Selenium, JAVA, Jira, XML, Eclipse IDE, GitHub, MS SQL, SQL, MS Office.

EDUCATION:

- Bachelor of Technology in Electronics and Communication Engineering, Jawaharlal Nehru Technological University, MLRIT, Hyderabad, India (2010-2014)
- Master of Science in Electrical Engineering, Northwestern Polytechnic University, Fremont, CA (2015-2016)
- Master of Science in Information Systems Security, University of the Cumberlands, Williamsburg, KY (2017-2019)
